

VitaBite AI

To make every meal a step toward a longer, healthier life — powered by AI and grounded in science.

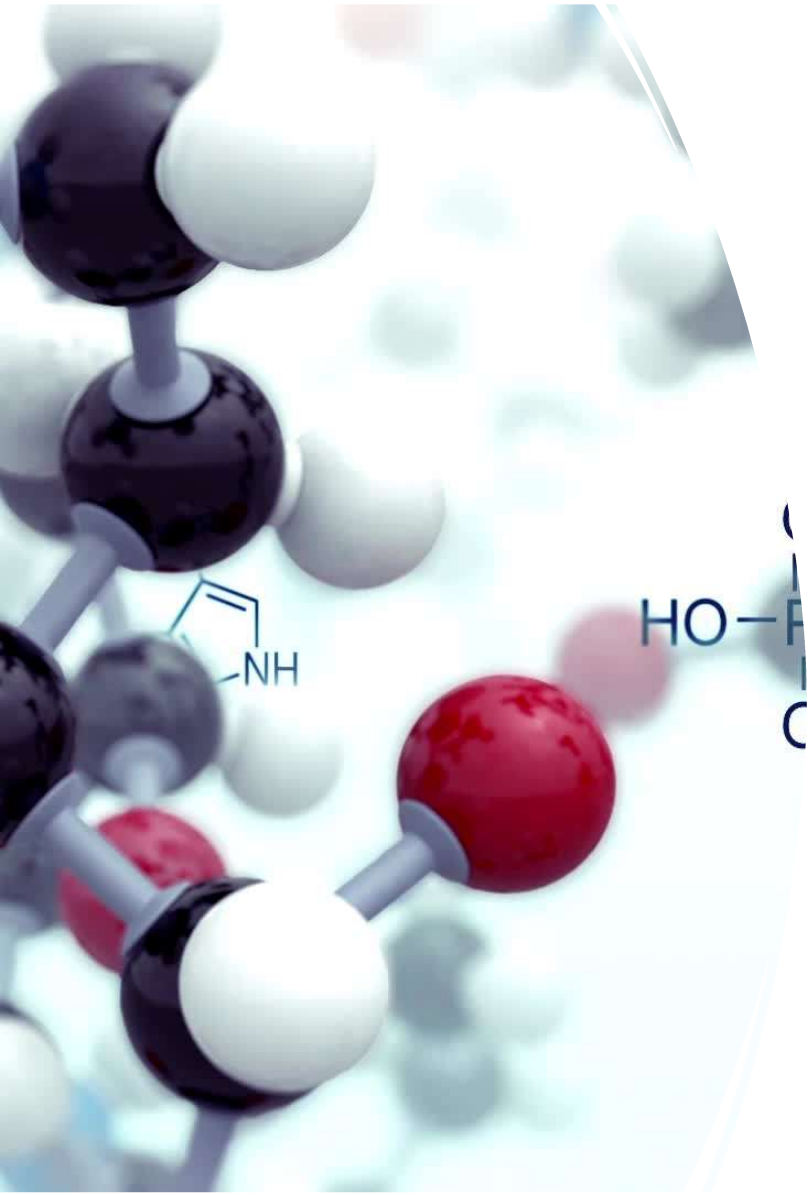

Executive summary

- **VitaBite AI** merges **longevity science**, **AI-driven nutrition**, and the **food & beverage sector** to create a new category: *precision longevity dining*. The company develops an AI platform that generates **biological-age-optimized meals**, **restaurant menus**, and **food product formulations**, targeting both **B2B** (restaurants, food brands, wellness programs) and **B2C** (health-conscious consumers). The 3-year plan focuses on **clinical credibility**, **scalable AI**, and **international expansion**, positioning Vienna as the ideal launchpad.

The Problem & Opportunity

- Aging populations demand **preventive, personalized nutrition**
- Restaurants and food brands lack **science-based longevity offerings**
- Consumers want **actionable, personalized health guidance**, not generic diets
- AI + biomarkers unlock **precision nutrition at scale**

The Solution: VitaBite AI Platform

- AI engine converts **biomarker data** into **longevity-optimized meals**
- B2B SaaS for restaurants: **AI-generated menus**, ingredient swaps, nutrient scoring
- B2C app: **personalized meal plans**, biological-age tracking, habit coaching
- White-label formulation engine for **food manufacturers**

Business Model & Market Entry

- Revenue: SaaS subscriptions, B2C premium plans, white-label licensing
- Early focus: **restaurants + meal-prep companies** in Vienna
- Expansion: Germany, Switzerland, Nordics
- Data partnerships with **clinics, insurers, wellness providers**

Roadmap (3 Years, 6-Month Stages)

0–6 months: MVP, 3–5 restaurant pilots, biomarker model baseline

6–12 months: Public beta, 10 restaurant partners, €20k MRR

12–18 months: Food-brand engine, clinical study, €60k MRR

18–24 months: Corporate wellness, supplement module, €120k MRR

24–36 months: International expansion, insurer API, €500k+ MRR

Team, KPIs & Strategic Edge

- Team blends **AI**, **clinical nutrition**, **biomarkers**, **F&B operations**
- Core KPIs: MRR, user growth, restaurant retention, biological-age improvement
- Strategic edge: **clinical validation**, **AI models**, **real-world food data**
- Vision: *“Every meal becomes a step toward a longer life.”*
